

Rosen Research Grants | Sergio Alvarez, Heather O'Leary, Christina E. Brown, Tida Bahar

each year provide an infusion of \$111.7 billion

to the economy.

But how can we expect to see sectors like oil, gas, coal, and

petroleum products, which have been

hit hard by the price of oil?

That's where the research comes in.

It's also surprising

that researchers have

been able to find

any correlations at all,

given the lack of

data available.

But that's not the case.

Researchers have

been able to find

correlations between

oil prices and

consumer behavior.

For example, oil prices

have been shown to

influence consumer

behavior in several

ways, including

the way people

spend their money

on things like

gasoline and

other necessities.

Oil prices have also

been shown to affect

consumer sentiment.

For example, oil

prices have been

shown to have a

negative impact on

consumer sentiment.

Oil prices have also

been shown to have a

positive impact on

consumer behavior.

Oil prices have also

been shown to have a

negative impact on

consumer behavior.

Oil prices have also

been shown to have a

positive impact on

consumer behavior.

Oil prices have also

been shown to have a

negative impact on

consumer behavior.

Oil prices have also

been shown to have a

positive impact on

consumer behavior.

Oil prices have also

been shown to have a

negative impact on

consumer behavior.

Oil prices have also

been shown to have a

positive impact on

consumer behavior.

Oil prices have also

been shown to have a

negative impact on

consumer behavior.
