ProTO: Proactive Topology Obfuscation Against Adversarial Network Topology Inference

by
Tao Hou

For the Ph.D. degree in Computer Science and Engineering

The topology of a network is fundamental for building network infrastructure functionalities. In many scenarios, enterprise networks may have no desire to disclose their topology information. In this paper, we aim at preventing attacks that use adversarial, active end-to-end topology inference to obtain the topology information of a target network. To this end, we propose a Proactive Topology Obfuscation (ProTO) system that adopts a detect-then-obfuscate framework to combat any potential attack.

Friday, July 10, 2020

3:00 PM

Online (Blackboard Collaborate)

Please email taohou@usf.edu for more information

THE PUBLIC IS INVITED

Examining Committee

Zhuo Lu, Ph.D., Co-Major Professor

Yao Liu, Ph.D., Co-Major Professor

Jay Ligatti, Ph.D.

Attila Altay Yavuz, Ph.D.

Kaiqi Xiong, Ph.D.

Yu Sun, Ph.D.

Graduate Program Director

Computer Science and Engineering

College of Engineering

If you require a reasonable accommodation to participate, please contact the Office of Diversity & Equal Opportunity at 813-974-4373 at least five (5) working days prior to the event.
